**Current Interest Club:**

- KIVA - an organization which has changed the trajectory of many lives in financially underserved communities worldwide. This is an organization founded in 2005 by Jessica Jackley to make [mostly modest] loans to entrepreneurs allowing people to control and change their lives. This is accomplished through "clubs" formed by interested people in bundling their money, choosing an individual [whose idea is featured online] in one of 15 areas - farmers, storekeepers, seamstress, artists, etc. and constructing a loan made through Pay Pal.
